

**ABSTRACT**

According to an aspect of the disclosure, the present invention provides methods and arrangements for using the internet and an internet access appliance to share images, wherein  
5 the images are captured, downloaded, and sent to a server. At the server, the images are  
parsed and posted to a web page. Subsequent communication is automatically sent to  
individuals selected by the sender to notify them of the posting of new images. The present  
invention provides an effective and efficient manner in which to share images for business,  
marketing, and home use.
